Nature is Right,
Do Not Polarise

True, of our civilisation, societies too,
And all the brewed ideologies that grew!

Don't polarise!
Nature is right.
There is time for a day and time for a night.

As the sun rises, darkness hides,
And as it sets, in a new moon, darkness rises.

The shadow is darkest where there is maximum light,
Dr Jekyll and Mr Hyde.
It's the external light that makes these shadows rise;

There's no shadow where your inner light guides!
